Clonallon

CUSTOMISING YOUR PATIENT CARE

Who is Clonallon?

Clonallon Laboratories Ltd was incorporated in 2001 to manufacture surgical and medical procedure packs for the global healthcare market. Based in a modern facility in Northern Ireland, Clonallon manufacture procedure packs in our Class 7 Cleanrooms.

All our processes and Quality Management Systems are accredited to ISO13485:2016 and MDD 93/42/EC. Distribution of Clonallon and third-party products is carried out from our own facilities and managed by our bespoke management information software. All Clonallon manufactured goods are provided with a Unique Device Identifier (UDI) which allows full traceability of the components used.

Firm clinical knowledge has allowed us to establish a trusted reputation within the healthcare industry and has enabled us to further develop and expand our services to contract manufacturing for both private and public sector customers. We have worked closely with Colposcopy Clinics across the UK and Ireland to develop a product portfolio to suit their clinical requirements.

We pride ourselves on our commitment to providing reliable and cost-effective solutions for our customers. Solutions that provide continuity for our customers and their patients when global supply chains are far from certain. All our procedure packs are fully customisable to the needs of each individual practice.

For any enquires please contact us for more information using the details below.

Clonallon

CUSTOMISING YOUR PATIENT CARE

Why Choose a Customised Procedure Pack?

A Customised Procedure Pack delivers a specific set of disposable medical products provided in a single packed sterile tray format.

Benefits of using a Customised Procedure Pack:

1. Reduction of preparation times for procedures releasing expensive nursing time for other activities.
2. Improve efficiency, reducing waiting times by increasing the number of procedures that can be completed.
3. Reduced ordering and administration costs.
4. Release more time for direct patient care.
5. Caters for healthcare professional's preference as all packs are fully customisable.
6. Reduction of clinical waste in the theatre – environmentally friendly.
7. Complete traceability of all CE marked components used.
8. Eradication of errors in setting up for procedure.
9. Elimination of the risk of cross infection from a re-usable device.

Benefits of working with Clonallon:

1. Clonallon has been at the forefront of customised procedure pack design and manufacture for over 20 years. Our competency in this area is second to none.
2. We will work closely with you to develop your customised procedure pack to suit your clinical needs.
3. Samples are provided for evaluation.
4. Once the pack contents have been established, we will ensure optimum stock holdings are maintained to facilitate immediate delivery for recurring orders.
5. All our products are CE marked.
6. Our Management Information System ensures complete traceability of components along the supply chain.
7. All our goods are fitted with a Unique Device Indicator.
8. All our packs are manufactured in our cleanroom facility in Northern Ireland. You can be confident of supply, quality and price competitiveness throughout the UK and Ireland.
